I. Course Description

Nazi Germany has become synonymous with evil after the Third Reich's final defeat in 1945. During twelve years, the Nazi regime perpetrated horrific crimes against humanity, crimes that culminated in the most well-known genocide in history, the Holocaust. At the same time, Nazi Germany offered numerous inclusionary policies in its bid to create a self-sufficient National Community. This course will examine the history of the Third Reich in ways that encourage us to think about the ways in which Germany's history in the first half of the twentieth-century still resonate in crucial ways in the world today.

The course will focus on the crucial elements of Nazism as a historical phenomenon: Nazi ideology, exclusionary policies, the attempted construction of the inclusionary National Community (Volksgemeinschaft), and the idea of the Third Reich as a “racial state.”

II. Course Goals

- **Explain Nazism as a historical system rather than a moral abstraction** – Students will be able to analyze Nazism as a coherent (if internally contradictory) political, social, and ideological project, understanding how racial ideology, state power, and everyday governance functioned in the Third Reich.

- **Analyze the relationship between exclusion, violence, and inclusion in Nazi Germany** – Students will be able to evaluate how genocidal policies and mass violence coexisted with and were enabled by inclusionary measures aimed at constructing the Volksgemeinschaft, rather than treating terror and consent as separate phenomena.
- **Assess the Third Reich as a “racial state” in theory, law, and practice** – Students will be able to examine how race structured law, citizenship, welfare, labor, family policy, and warfare, and to distinguish between ideological claims and lived realities within Nazi Germany.
- **Connect the history of Nazi Germany to enduring questions in the modern world** – Students will be able to apply historical insights from the Third Reich to contemporary issues such as nationalism, state violence, racialization, propaganda, and collective memory, while recognizing the specific historical conditions that made Nazism possible.
